

A decorative border of playing cards surrounds the text. The border consists of a repeating sequence of four suits: Heart (red), Club (black), Diamond (red), and Spade (black).

# 3 to 13- Jennelle

## The Setup

The game requires two decks of cards containing 4 wild cards and can contain 2 to 8 players (if more, add another deck)

## Winning a Hand

You can win a hand by using all of your cards to:

- Create a set of 3 of a kind
- Create a run within the same suit of 3 or more cards

## Counting Points

Each round will have a wild card respective to the number of cards dealt, these cards and jokers count as 0 points at the end of the round.

Ace- 1 point

2, 3, 4, 5, 6, 7, 8, 9- Face value of points

10, Jack, Queen, King- 10 points

At the end of the round, the remaining cards \*not included in any sets\* are added to the players score.

## The Game

The dealer will give each player 3 cards placing one face up in the middle. The person to the left of the dealer may choose to pick up the card in the middle or draw from the deck and then discard one from their hand. The draw then moves clockwise. In the first round, 3's and jokers are wild cards. The first player to have a winning hand will place down their cards on their turn (this can be directly after a draw and can include the card drawn if needed to make a set) stating "I'm out". After this, each player has one more turn to minimize their points. Points are totaled at the end of the round. The goal is to have no points.

The dealer rotates at the end of the round clockwise. The next dealer will give each player 4 cards and repeat the steps from the first round. This round 4's and jokers are wild. Cards can be played in a set of 4 for this round.

In the 5th hand, players are able to pick up the sixth card and keep it on the last round to make two winning sets of three.

Repeat for 6-13. Jacks are wild in the 11th hand, Queens in the 12th and Kings in the 13th.

The winner is the person with the least amount of points at the end of 13th rounds.
