Irish Poker w/ Riding the Bus

Pass out 4 cards to each person facedown

Going in a circle, starting left to right, each person guesses what the card is

First: Red or Black

Second: Higher or lower than the first card

Third: Inside or outside the first two cards

Fourth: Suit

If you are correct you give out drinks, if you are wrong you take drinks

The drink amount increases per card

Depending on how wild you want to get, you can take/give:

1,2,3,4 drinks

Or

2,4,6,8 drinks

After all cards have been turned over, setup a pyramid face down in the middle of the table.

One by one reveal the cards.

If you have that card, you stack it in the middle and assign the associated number of drinks following the same pattern as used for the first part

Whoever has the most of the four original cards left once the pyramid has been revealed, you ride the bus

To ride the bus: It is you against the deck. You guess red or black, higher or lower, inside or outside, and suit until you get it right. If you mess up, you start at the beginning.
