

A decorative border of playing cards surrounds the text. The top and bottom borders are complete rows of cards: Heart, Club, Diamond, Spade, Heart, Club, Diamond, Spade, Heart, Club, Diamond, Spade, Heart, Club, Diamond, Spade. The left and right borders are vertical columns of cards: Club, Diamond, Spade, Heart, Club, Diamond, Spade, Heart, Club, Diamond, Spade, Heart, Club, Diamond, Spade, Heart.

Tonk - Jaya

The Goal

Players aim to either play all cards in their hand or have the lowest total value of unmatched cards to win the round.

Number of Players

Tonk is suitable for 2 or more players, though it can become challenging with 5 or more.

Card Values

- > Face cards: 10 points each
- > Aces: 1 point each
- > Number cards: Face value

The Deal

- > The dealer deals five cards to each player one at a time. The remaining deck becomes the stock.
- > If a player's initial hand totals 15 or fewer points or 49-50 points, they must declare it as a tonk. The player who declares tonk first if multiple players qualify receives 2 points.

The Play

- > Players aim to form spreads, which can be books (three or four cards of the same rank) or runs (three or more cards in sequence of the same suit).
- > Play begins with the player to the left of the dealer and proceeds clockwise.

On a turn, a player can:

1. End the play without drawing by placing all cards face-up on the table, claiming to have the lowest total value of cards in hand compared to others (going out low).
2. Draw the top card from the stock or the discard pile, aiming to reduce their hand by creating or adding to spreads. The turn ends by discarding a card to the top of the discard pile.
3. In games with 3 or more players, a player can pick up the top or second card from the discard pile.

Adding Cards to Spreads

- > Players can add cards to existing spreads during their turn before discarding.
- > Playing on another player's spread blocks them from going out low on their next turn only.

Ending the Game

The game continues until:

- > A player plays all their cards without discarding (tonk) and receives 2 points.
- > A player runs out of cards after discarding, with the player having the empty hand collecting 1 point.
- > The stock runs out, requiring reshuffling the remaining stock and continuing play.
- > When a player declares low or runs out of cards, each remaining player exposes their hand, and the total value of cards held is calculated.
 - > If the declaring player truly has the lowest total, they win 1 point.
 - > If the declaring player does not have the lowest total, they lose 1 point, and each remaining player receives 1 point.
- > The game is won when the first player reaches 10 points. In case of a tie, continue playing until a tie-breaker winner emerges.
