

Garbage - Lexa

The Goal

Put all of the cards faceup in the correct place.

The Deal

Each player deals ten cards face down in front of them, making two rows of five, as shown below. The rest of the cards are placed in the center of the table as a draw pile.

1	2	3	4	5
6	7	8	9	10

The Game

Take turns drawing, whatever card you draw, you put it in the place of the corresponding facedown card. Example: 5 should be the fifth card place (Top right). If you can use the card underneath, you put that in the corresponding facedown card as well. This cycle continues until you cannot use the card anymore, then you discard it. The next player can either use the discarded card or draw from the top of the pile.

Special cards: Kings are wild cards and jacks and queens don't mean anything (cannot be used)

Ending the Game

You win the round when all cards are faceup in order. Each person gets one more attempt.

*Note: If you want to keep playing, the winning person starts with one less card and you go until someone has zero cards left to start. The person that gets to zero wins.

Example: I won the round, you lost the round: I start with 9 cards and you start with 10 cards.
